HOSE-PULL®

Operation and technical support device

Hose-Pull® is an **adaptable** and **very robust** technical support tool. The device assists personnel on the field by significantly **improving** the **mobility** of a **large and long hose lay**. With their **omnidirectional wheels**, It can move all over **different types of surface**. By reducing hoseline ground friction, it eases their movements on the fireground areas and **reduces physical stress** while handling it.

1 Ballpoint Spindle or Universal Velcro Clasp

- Keeps pipes in place even under **high stresses.**
- **Easy** to attach with **safety gloves.**
- **Resistant** to deformation, water and dirt.

2 Support Polyamide (PA-66)

- Highly resistant to **weight.**
- Highly resistant to **extreme temperatures.** (-20 +180°).
- With a circumference of over 200 degrees for **optimum pipe locking.**
- Available in **different size** (From 70 to 110 mm).

  + adapters (all sizes < 110mm)
  + made to mesure (6inches, 8inches)

3 Omnidirectionnal Wheels

- Mobility on **all axes** : 12 overmouled olive wheels integrated into a polymer rims.
- Works on **all types of surfaces.**
- Available in **different color.**
- Reducing **musculoskeletal disorders.**

4 «Slic Pins» Assembly

- **Patented** stainless steel spindle. **(100% Stainless steel)**
- **Quick** and **easy** assembly (in less than 5 seconds.)
