

NEBOSH PSM - *Only in English*

Process Safety Management

HSE Certificate in Process Safety Management

Aegide International offers the NEBOSH HSE Certificate In Process Safety Management. This process safety management qualification is the result of the unique collaboration which combines the advanced technical 'high hazard' expertise of HSE with NEBOSH's ability to deliver strong vocational OSH qualifications. This qualification is designed to equip delegates with a broad understanding of the accepted principles and recognised industrial practices for the management of process risk. This will ensure that they can recognise and contribute to the control of process safety hazards.

TARGET AUDIENCE

People from all around the world who work in process industries such as oil and gas, chemicals, plastics and pharmaceuticals. Ideal for managers, safety representatives and health and safety advisors working within the process industries, both inside and outside the UK. It is not designed for chemical and process safety engineers experienced in the specification, design and maintenance of process plant.

PREREQUISITES

- It is recommended that learners should already have an underpinning knowledge of health and safety issues.
- Reading and writing in English.

OBJECTIVES

- This qualification aims to provide holders with the knowledge and understanding of process safety management to ensure that they can contribute to the effective management of process safety risks.
- This qualification builds on the understanding already gained by studying the NEBOSH International General Certificate in Occupational Health and Safety.
